

myradiotest

Catalogue Music Test

For a new format or a total catalogue refresh, a full music test can provide a complete review of your active music library. myradiotest catalogue music tests are capable of testing 1000+ songs over two or three sessions.

The myradiotest difference

Catalogue Music Test have already been used to conduct hundreds of music surveys around the world. Stations can use either external or internally recruited sample panels. Results of this survey can be exported into most music scheduling software, and then sent to BPR consultancy, for discussion of further options. For more information on our Catalogue Music Tests, contact us at info@bprworld.com
